

Let's get circular!

Swap out your plastic for reusable takeaway containers

We love the Northern Beaches and want to protect our beaches and bushland.

Why?

A Circular Container system will reduce the impact of your business and waste costs. You can also boost staff morale and encourage a positive reuse culture in your business.

So how does it work?

1. Promote reusables to your staff using provided resources.

2. Place your containers in high traffic areas for distribution e.g. kitchen and exits so that staff take them on their lunch break.

3. Order food and ask the food retailer to serve it in a reusable container.

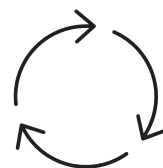

4. Enjoy zero-waste lunch.

5. Return to the office and place it in dishwasher for cleaning.

6. Keep a tally of reuse to report sustainability successes. You could even make it a competition within your office to get the containers circulating!

7. Reuse again and again.
