3.0 DEVELOPMENT DETERMINATION PANEL REPORTS

3.5 DA2024/1597 - 50 CASTLE CIRCUIT SEAFORTH - ALTERATIONS AND ADDITIONS TO A DWELLING HOUSE INCLUDING A SWIMMING POOL

PANEL MEMBERS

Daniel Milliken	Manager, Development Assessment
Steve Findlay	Manager, Development Assessment
Paul Christmas	Principal Planner, Strategic & Place Planning

PROCEEDINGS IN BRIEF

Panel members visited the site and surrounds.

The Panel was addressed by one objector and a representative of the applicant.

The Panel delayed the initial decision to allow the applicant time to address the Panel's concerns in relation to the bulk of the southern elevation and its related amenity impacts.

The applicant submitted amended plans that reduced the height and western extent of the southern elevation there by improving solar access and reducing bulk and scale.

The Panel is now satisfied that the proposal is an acceptable outcome in the context and constraints of the site.

The Panel concurred with the Officer's Assessment Report, Supplementary Report and recommendation.

STATEMENT OF REASON

The proposal generally satisfies the relevant strategy, objectives and provisions of Manly LEP 2013 and the Manly DCP 2013 subject to conditions.

COMMUNITY CONSULTATION

Issues raised in the submissions have been taken into account in the report and the meeting.

DECISION ON EXCEPTIONS TO DEVELOPMENT STANDARDS

The Panel is satisfied that:

- 1) the applicant's written request under clause 4.6 of the Manly LEP 2013 seeking to justify a contravention of clause 4.3 Height of Buildings and 4.4 Floor Space Ratio development standard has adequately addressed and demonstrated that:
 - a) compliance with the standard is unreasonable or unnecessary in the circumstances of the case; and
 - b) there are sufficient environmental planning grounds to justify the contravention.
- 2) the proposed development will be in the public interest because it is consistent with the objectives of the standard and the objectives for development within the zone in which the development is proposed to be carried out.

DETERMINATION OF DEVELOPMENT APPLICATION

THAT Council as the consent authority, **approves** Application No. DA2024/1597 for Alterations and additions to a dwelling house including a swimming pool at Lot 11 DP 200638, 50 Castle Circuit SEAFORTH subject to the conditions set out in the Assessment Report, with the following changes:

1. The replacement of condition 1 in the Assessment Report, with condition 1 in the Supplementary Memo.
2. The addition of the following condition, to read as follows:

Construction Traffic Management Plan

A Construction Traffic Management Plan (CTMP) and report shall be prepared by a Transport for NSW accredited person and submitted to Council via an application for a Permit to Implement Traffic Control. The application form can be accessed via <https://www.northernbeaches.nsw.gov.au/council/forms>. Approval of the permit application by the Northern Beaches Council Traffic Team is required prior to issue of any Construction Certificate.

The CTMP must address following:

- The proposed phases of construction works on the site, and the expected duration of each construction phase.
- The proposed order in which works on the site will be undertaken, and the method statements on how various stages of construction will be undertaken.
- Make provision for all construction materials to be stored on site, at all times.
- The proposed areas within the site to be used for the storage of excavated materials, construction materials and waste containers during the construction period.
- The proposed method of access to and egress from the site for construction vehicles, including access routes and truck routes through the Council area and the location and type of temporary vehicular crossing for the purpose of minimising traffic congestion and noise in the area, with no access across public parks or reserves being allowed.
- Where access is required across private property not in the direct ownership of the proponent, such as a private road/driveway, community title road or right of way, the CTMP is to include:
 - Evidence of the legal right and terms to use the access route or provide owners consent from the owners/strata/community association.
 - Demonstrate that direct access from a public space/road is not viable for each stage of works.
 - An assessment to be carried out of the physical constraints of the Right of Carriageway to determine the maximum size of vehicle that may access the site via the Right of Carriageway during construction.
 - Unless owner/strata/community associations consent is obtained, vehicles are not to exceed 24 tonnes or 7.5 metres in length (an assessment must be undertaken that the surface is capable of supporting up to 24 tonnes, otherwise the weight limit should be reduced in the CTMP). If consent is obtained, a copy must be included in the CTMP.
 - No construction vehicles, materials or plant are to be located or parked in the private road/driveway, community title road or right of way.
 - How any disruption to other users of the private road/driveway, community title road or right of way will be minimised and all users kept informed of likely disruption where the access will be closed or blocked for any given time.
 - If trees are located within or overhang the access route, a tree protection plan prepared by an Arborist with minimum AQF Level 5 in arboriculture demonstrating how any trees within the Right of Carriageway will be protected from damage by construction vehicles. Should any tree protection measures be required on private

land in accordance with AS4970-2009 Protection of trees on development sites, owner's consent must be obtained.

- A Dilapidation report, including photographic surveys, of the private road/driveway/right of way must be included prior to any works commencing on the site. The report must detail the physical condition of the private road/driveway/right of way, and any other adjacent private property assets (including trees) or adjacent public property that may be adversely affected by vehicles servicing the development site to undertake works or activity during site works.
- A requirement for Post-Construction Dilapidation Reports, including photos of any damage evident at the time of inspection, to be submitted after the completion of works and prior to the Occupation certificate. The report must:
 - Compare the post-construction report with the pre-construction report,
 - Clearly identify any recent damage or change to the private road/driveway/right of way and whether or not it is likely to be the result of the development works,
 - Should any damage have occurred, identify remediation actions taken.
 - Be submitted to Council with the Occupation Certificate.
- The proposed method of loading and unloading excavation and construction machinery, excavation and building materials, formwork and the erection of any part of the structure within the site. Wherever possible mobile cranes should be located wholly within the site.
- Make provision for parking onsite. All Staff and Contractors are to use any basement parking once available.
- Temporary truck standing/ queuing locations in a public roadway/ domain in the vicinity of the site are not permitted unless approved by Council prior.
- Include a Traffic Control Plan prepared by a person with suitable RMS accreditation for any activities involving the management of vehicle and pedestrian safety.
- The proposed manner in which adjoining property owners will be kept advised of the timeframes for completion of each phase of development/construction process. It must also specify that a minimum Fourteen (14) days notification must be provided to adjoining property owners prior to the implementation of any temporary traffic control measure.
- Include a site plan showing the location of any site sheds, location of requested Work Zones, anticipated use of cranes and concrete pumps, structures proposed on the footpath areas (hoardings, scaffolding or shoring) and any tree protection zones around Council street trees.
- Take into consideration the combined construction activities of other development in the surrounding area. To this end, the consultant preparing the CTMP must engage and consult with developers undertaking major development works within a 250m radius of the subject site to ensure that appropriate measures are in place to prevent the combined impact of construction activities, such as (but not limited to) concrete pours, crane lifts and dump truck routes. These communications must be documented and submitted to Council prior to work commencing on site.
- The proposed method/device to remove loose material from all vehicles and/or machinery before entering the road reserve, any run-off from the washing down of vehicles shall be directed to the sediment control system within the site.
- Specify that the public roadway (including footpath) must be kept in a serviceable condition for the duration of construction. At the direction of Council, undertake remedial treatments such as patching at no cost to Council.

- The proposed method of support to any excavation adjacent to adjoining properties, or the road reserve. The proposed method of support is to be designed and certified by an appropriately qualified and practising Structural Engineer, or equivalent.
- Proposed protection for Council and adjoining properties.
- The location and operation of any on site crane.

The CTMP shall be prepared in accordance with relevant sections of Australian Standard 1742 – “Manual of Uniform Traffic Control Devices”, RMS’ Manual – “Traffic Control at Work Sites”.

All fees and charges associated with the review of this plan is to be in accordance with Council’s Schedule of Fees and Charges and are to be paid at the time that the Construction Traffic Management Plan is submitted.

A copy of the approved CTMP must be kept on-site at all times while work is being carried out.

The development is to be undertaken in accordance with the Construction Traffic Management Plan approved by Northern Beaches Council Traffic Team.

Reason: To ensure public safety and minimise any impacts to the adjoining pedestrian and vehicular traffic systems.

Vote: 3/0

This is the final page of the Minutes comprising 8 pages
numbered 1 to 8 of the Development Determination Panel meeting
held on Monday 31 March 2025.
