Pre-school Program
Our pre-school programs are led by an experienced environmental educator and provide an opportunity for children to have a sensory connection to the environment. We provide a positive and engaging presentation complete with living creatures.

Cost & Timing
Our activities run for one (1) hour.
- The pre-school program is offered every week day
- The minimum charge is $275 for a group of 20 children or less (maximum of 20 children per class). For more than one activity the second activity is charged at $9.90 per child. All charges are inclusive of GST.

Ages
The program is designed specifically to meet the needs of children aged 3-6 years.

Adult to Child Ratio
A ratio of 1 adult to 5 children is required.

Testimonials
“The children were engaged with Jane’s presentation from start to finish! Every aspect of the session was fantastic and suitable for our Pre-school age group.”
“The sorting table was a great hands on experience.”
“Hands on activities very beneficial for children with autism.”
“The rock platform was by far the highlight of the experience”

The CEC (A) is a short 100m walk along Pelican Path (towards the ocean - on your left).
Pre-school Program

Northern Beaches Council has updated our preschool program to engage preschool children in connecting with the natural environment.

We are excited to offer you this fun and interactive program that allows children to touch, feel and connect with coastal and bush environments. All our programs are run as an incursion to preschools and provide the children with a personal experience and a positive environmental message.

Our program allows children in the early learning stages to form a close connection with the natural environment through physical contact and experiential learning.

The ‘Where the Land Meets the Sea’ program is a truly engaging and memorable experience for children.

All programs link to “Early Years Learning Framework”

Coastal Program

- Children will explore the virtual ‘rockpool’, look at the shells of animals who live there and create their own rockpool of wonders
- We will look at the sea creature specimens and talk about the life-cycle of Port Jackson Sharks
- Children are encouraged to touch and experience the shape, colour and feel of various shells, sponges and preserved specimens.

Bushland Program

- The bushland theme allows children to learn about our native plants and animals in hands-on engaging activities
- Children are encouraged to have a sensory experience with a range of bush treasures, learning about the life-cycle of plants and their importance to our native creatures
- Fun interactive activities that create a home for our animals
- Examine some mini beasts
- This activity is accompanied by a visit from Sydney Wildlife, complete with native animals.
